B/NA AUTHORITY CONTROL

Improving patron access to your online catalog.

Loading MARC records into an online catalog? The B/NA automated authority control system can perform name and subject authority control on your MARC database and give you fully edited catalog tapes in the MARC II format. If your online catalog has an authority control module, the B/NA authority control system can also provide deblinded cross reference tapes in a format compatible with *LC MARC for Authorities* for loading into the system. Simply send us your catalog tape and we match your MARC records against current LC name and subject authority files to provide your library with the most up-to-date consistent headings available.

Why choose authority control from B/NA?

Quality. Sophistication. Leadership. Ten years experience with authority control. No other system equals ours. Drawing from our constantly updated authority files and the skills of our experienced editors, this unique B/NA service frees your staff from retrospective authority control tasks.

A quality science library without the *Science Citation Index*®?

Unlikely.

For over 20 years, the *Science Citation Index* has been an integral part of science reference collections. Why? Because the *SCI*® gives you access to the world's most significant scientific and technical literature. Because it offers unmatched breadth of coverage, depth of indexing, and precision of retrieval. And because the *SCI*'s cumulated editions make it easy to search back to 1955.

If you've used the *Science Citation Index*, you know it's *more* than a valuable search tool. You know it's also an important tool for performing bibliographic verification . . . following scientific

development across 100 disciplines . . . tracking faculty publishing . . . and determining who's citing whom.

Your subscription to the *Science Citation Index* gives you all of this . . . plus it qualifies you for reduced rates on *SCISEARCH*®, the online version of *SCI*.

And the *Science Citation Index* is available at special grant rates to libraries that qualify.

To find out more about the *Science Citation Index* and its place in *your* library—or for information on ISI's Grant Program—write or call us at the address below.

The new 1985 edition of the "Dictionary of Leadership and Management" is the first complete cyclopedic desk reference that gives you an accurate coverage of and easy, one-step access to the latest definitions in the conceptual and procedural aspects of modern leadership, administration, management, supervision and training in private and public sector organizations, bodies, agencies, institutions and systems.

Designed for practicing organizational leaders, educators, librarians and information specialists, this advanced, in-depth scholarly reference puts at your fingertips in one handy, easy-to-use volume over 15,000 new organizational terms, concepts, phrases, synonyms, antonyms, acronyms, initialisms and symbols that are used in professional planning, organizing, staffing, developing, coordinating, reporting, budgeting, etc., techniques and activities. It provides you with detailed descriptions of all professional leadership, administrative, managerial and supervisory tests which are used in hiring and promotions. It provides you with detailed descriptions of all major national and international organizations and bodies and the professional certificates, credentials and advanced degrees they bestow upon practicing leaders and other professionals via formal and home studies and/or qualifying exams. And, it provides you with a comprehensive directory of new organizational leadership and management training publications and media now in use, worldwide.

No matter what size of business, government or education library or information center you're in, you will find this new comprehensive cyclopedic guide an invaluable aid in providing fast and accurate reference and research service to organizational and community leaders and students of leadership, and those who are preparing for examinations and interviews.
